Customer Reviews

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide. Geoffrey A. Hirt is currently Professor of Finance at DePaul University and Director of Equity Research at Mesirow Financial. He received his PhD in Finance from the University of Illinois at Champaign-Urbana, his MBA from Miami University of Ohio and his BA from Ohio-Wesleyan University. Geoff has directed the Chartered Financial Analysts Study program for the Investment Analysts Society of Chicago since 1987. From 1987 to 1997 he was Chairman of the Finance Department at DePaul University and taught investments, corporate finance, and strategic planning. He developed and was director of DePaul's MBA program in Hong Kong and has taught in Poland, Germany, Thailand, and Hong Kong. Geoff has published several books. The sixth edition of Fundamentals of Investment Management was released in July 1998 and is published by Irwin/McGraw-Hill. Additionally, Geoff is well known for his book Fundamentals of Financial Management published by Irwin/McGraw-Hill. Now in its eighth edition, this book is

used at over 600 colleges and universities worldwide, and it has been translated into Chinese, Japanese, and Spanish. Geoff plays tennis and golf, is a music lover, and enjoys travelling with his wife, Linda.

One of the worst textbooks I've ever used. They make no use of the margins for explaining terms or trying to be remotely interesting. The chapters in this book are comprised of massive walls of text with a few bolded words and graphs. The real issue is this: they do not even explain how to do many of the end-of-chapter problems. Instead of referencing page numbers next to problems for explanations, they list their learning objectives at the start of the chapter, which are not even pointed out in the text as they are addressed. Extremely disappointed.

Seller sent the book and I received it on time. The rating is based on the book's content. The writers did not do a very good job, the technical writing was poor, and not outlined very well. They used the wrong wording in the questions. Clarity was not there. There were also not a lot of images of examples to keep you up to speed. Thank goodness for YouTube and the people who have taken the time to teach in 5 minutes what it took me hours to decipher in this POS text. I would recommend that any college that chooses to use this book seriously considers their accreditation policies because this was the worst.

Worst book about finance I have ever seen, I cannot believe this is a required text book. Nothing in it makes any sense and likely unusable info

I am a business major and am required to take finance. This. Is. Incredibly. Confusing. I absolute hate it.

Very pleased with this product

This book doesn't give formulas and examples that match the problems at the end of each chapter. If your instructor says you don't need the Connect Plus with this book - buy it anyway! One of the most confusing texts I've ever used.

Very good price

Pretty concise. Colorful printing. Explanations of topics are understandable. Seemed like something geared toward high school.
