Synopsis

"Wild child" Sasha Sheppard, the sister of the first woman President of the United States, is suspected of committing murder in a drug-induced frenzy. Sasha's life has been spinning out of control for years, but is she capable of three gruesome murders? After an attempt on her own life and her sister's involvement in murder, President Ingrid Sheppard suspects powerful people would stop at nothing, including framing Sasha, to prevent her from serving a second term in the White House. Desperate, Ingrid turns to two women for help: Sidney DeRoche and Liberty Starr. Sidney DeRoche is Ingrid's best friend and a renowned defense attorney. Can Sidney defend Sasha, her ex-lover who once broke her heart? Liberty Starr, a former agent/assassin for the government, is asked to come out of seclusion to protect the President and her family. Twists and turns pit Liberty against an old foe, a chameleon who might be better than she is. Will Liberty be able to find this other assassin before tragedy consumes the President and her sister, and the many lives they touch? Or will Liberty be the one who ultimately pays the highest price of all?

This is the second book with the Talon's Liberty. The plot is intricate and exciting. I love the characters in this story. The relationships amongst the characters are explored in depth. I hope I live to see the first female, gay president! I would like to have more fight scenes but I'll take this one just the way it is. If you like intrigue and love then this is the book for you!

This is the 4th time that I have read this book. That should say if all don't you think :-)

The characters from talon are back. They built a story using some of our favorites and add a few more intriguing women. And Liberty is back. Loved the story, loved the characters. I want more from Ms Mercer.

This had me on the edge the entire story. Love, romance, heartbreak, heartache, mystery all interwoven into a great thriller. I didn't want it to end.

Enjoyed the story and characters very much. Would highly recommend giving this one a go. Waiting for the next one from J. P. MERCER

Excellent book. I can't wait for the next one in the series.

"Oh what a tangled web we weave, when first we practise to deceive!" Sir Walter Scott Beautiful women, a triple homicide, suspense, intrigue and enough plot twists to make a pretzel. J.P. Mercer must have a new novel. Ingrid Sheppard is the first woman president of the United States and she's running for a second term. That alone would be enough to rally certain forces against her, but the fact that she's also a lesbian has the conservative right in an uproar. How far would they go to keep her from winning? When Ingrid's younger sister Sasha is found in a house with three women who have been brutally slaughtered and she's covered in blood, she seems to be the logical suspect and also the end of Ingrid's chances for re-election. All may not be as it seems though. With this coming soon after an attempt on Ingrid's life, Ingrid begins to wonder if her sister is being framed for a crime she did not commit. The president asks for help from two women who are the best in their fields. Sidney DeRoche is one of the top defense attorneys in the country, Ingrid's best friend and Sasha's

ex-lover. With an out of control district attorney screaming for Sasha's blood, Sidney's job is to protect the woman who once broke her heart. Liberty Starr is one of the two remaining Talons, a group of highly trained agent/assassins once used by the government. She has retired, but when she is summoned, her sense of duty brings her from the mountains of Montana to see if she can discover who committed the murders, who is trying to kill the president and if the two situations are connected in any way. As Liberty tries to unravel what exactly is going on, she is confronted with the fact that she may lose something that is more important to her than any duty she feels to her country or president. When a spider weaves a web, it has many strands. Some lead straight to the center, some lead off of the web and the others are distracters intended to confuse the prey until the spider pounces. Mercer's Web is like that. There are multiple motives for the murder that cross and crisscross until the reader can't be sure which one is leading to the truth and there is always a nagging sense that the spider is about to pounce. Mercer shows that women who seem to have no relevance to each other, through the right series of circumstances, follow paths that intersect in unpredictable ways. There are no extraneous scenes in this book, but there are those that lead to deliberate misperceptions about the story. The challenge to the reader is to figure out what is happening before Mercer tips her hand. She uses a combination of flashbacks and forward action to define just enough about the characters to keep the story together and moving. This is a book with plenty of action, suspense and a touch of romance; one of those that is compelling and may make the reader want to finish it in one sitting. This isn't one to start at night if you intend to get much sleep.

Always enjoy reading J.P.MERCER. She write a good story and love interest. Again thriller/love story to get your juices going. this one i give **** star. Another book worth reading by this author my only fault with it was the ending felt rushed but i will read it again. Again this is my thoughts on this book.
