All You Need To Know About Hydroponics: How To Create The Perfect Hydroponic System

Synopsis

Hydroponics is a growing global phenomenon that will revolutionize our life on earth. Our future is based on this technology and the discovery of the value of hydroponics is spreading worldwide. Organic urban gardening is a term we encounter more often in everyday life, whether we are professional growers and ordinary civilians with no experience of farming. Are you going to build your own hydroponic system? Already established but want to improve your knowledge of the theory and practice? It doesn't matter if you use hydroponic systems like Wick Systems, Deep Water Culture (DWC), Nutrient Film Technique (NFT), Ebb and Flow (Flood and Drain), Aeroponics, Aquaponics or the well known Drip Systems that is widely used in urban organic gardening - this book will cover it all and give you the guidance that you need. This new book, All You Need To Know About Hydroponics, gives you a great insight into what hydroponics is, how to build your own system and pitfalls that may be on the way. The chapters contain knowledge on: - History of hydroponics - The basics of different hydroponic systems - How to control your pH - Correct nutrient solutions - What lighting do you need? - What growing media materials are best to grow in? - How do these growing media look and act? - Common pitfalls and pesticides to watch out for! - And much more! This amazing resource could help you establish your own hydroponic commercial activities, contribute to your independent living and how to help others come together in a future hydroponic world. Get Your copy of, All You Need To Know About Hydroponics, today!

Customer Reviews

I really enjoyed this guide! The book contains many useful tips and explains how to start growing

fruits and vegetables. The step by step instructions are very easy to understand and follow. I have learned some techniques about how I can start to grow my own produce. I recommend it for all people who wants to have a hydroponic garden in their home. Hydroponics as I have read seems quite challenging, but a fun way of planting. What I like about this book is that it has taught me some tips on how to be successful in using this particular method of planting. I find the reminders very useful especially in maintaining the proper PH, what materials to use, what can be harmful to me and my plants. The book gave me an insight in how Wick system, Water Culture, Ebb and Flow (Flood & Drain), Drip system (recovery or non-recovery), N.F.T. (Nutrient Film Technique), Aquaponics and Aeroponic works. The book also contain pictures of each system. Great buy, I recommend it!
