For Elaine N. Marieb, R.N., Ph.D., taking the needs of nursing and other allied health students into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy & physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. This experience, along with continual feedback from health care professionals (including generations of former students taught by Dr. Marieb), has inspired the unique perspective and accessibility for which this book is known.Ã Â Dr. MariebÃ¢â¬âs commitment to students extends beyond teaching and writing. Recognizing the challenges students face, Dr. Marieb contributes to the New Directions Program at Holyoke Community College by

funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time. She also funds the E.N. Marieb Science Research Awards at Mount Holyoke College (which promotes research by undergraduate science majors) and has underwritten renovation and updating of one of the biology labs in Mount Holyoke's Clapp Laboratory. Recognizing the severe national shortage of nursing faculty, Dr. Marieb also underwrites the Nursing Scholars of the Future Grant Program at the University of Massachusetts at Amherst. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Pearson Education Interactive Physiology® CD-ROM series. This text's Essentials of Human Anatomy & Physiology, Eleventh Edition is the latest expression of her commitment to the needs of the students pursuing the study of A&P. When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the board of directors of the famed Marie Selby Botanical Gardens and on the scholarship committee of the Women's Resources Center of Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

I could not love this book more, even if I tried. Strongly recommend it. Get ready to understand. It includes questions to help quiz yourself and many detailed diagrams.

I love this book. Had to use it for my Anatomy class. It's so well broken down and easily understood. No matter your experience with Anatomy, first timer or professional, this book is great for all.

Had to buy for my anatomy class. It does a good job at explaining the essentials of each system
good condition needed it for college

This book is actually a pretty easy read. It is required reading for my course but I would definitely

recommend it for supplemental ANP material. I would not however recommend this book if you are trying to teach your self ANP or if its not the book your program recommends because it is not as in depth enough for most courses.

Great book. Learned a lot of great information from it. Great quality when I rented it.

Book is torn and folded and looks like it's falling apart. A lot of scrap paper in the book too.

Good price for this book
