Customer Reviews

DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years. --This text refers to the Map edition.

If you like exploring back roads, these books are an absolute must. I've bought one for every state I've lived in. Google maps and GPS are great resources and I use them both, but I keep coming back to this when I need to survey large areas quickly and pick routes. This is a great tool for planning my motorcycle trips. No computer can compete with the data throughput of flipping through a book of maps. If I had one suggestion, it would be to identify which roads are dirt (or gravel) and

which roads are paved.

old school but well detailed. My NAV system is rigid and inflexible and makes it hard to plan the best routes. These map books are very detailed at a scale that really helps when out on the road. They aren't as good for navigating through towns, but perfect for exploring the country side. too bad they are discontinued, but you can still find them on the secondary market.

Had a prior edition of the DeLorme Pennsylvania Atlas but it was used so often that it needed to be replaced. Love it!

This is pretty huge. It provides excellent detail on the maps, and easy to use key and a pretty thorough index. Maps are well detailed and easy to read, and each map tells you what the adjoining sections are and provides some overlap for ease in crossing panels. Because of the size, it would be a bit unwieldy behind the wheel, but you should be stopped anyway if you're looking that closely. You can get a general layout of the streets of a town with this, but you won't get the street names. It does however contain a surprising amount of backroads, even in places where maps are sometimes difficult to find (Potter County). Definitely a great book for navigating the backroads.

We bought this for a vacation trip and found we used it some, mostly as a back up to our GPS and online maps. But there's something "wrong" with the way these maps have been printed. They are not visually pleasing and are, in fact, hard to read--not up to the usual DeLorme standard--or my eyes are getting bad--or both. A magnifying glass might help, but I'm not sure it's just size of print. I think it's fonts, colors, etc. In the area we used (basically only one county) we found the maps accurate and complete and they did occasionally prove useful because of the level of detail.

Wanted a resource for times when satellite and electronic media isn't available. This has all the level of detail I was looking for.

I use my Michigan Recreational Atlas constantly - as a record of places I photograph and for potential photo ops. As I'm leaving for PA next month to photograph the Elk herds, it seemed like a good idea to get the PA version. However, because it's high on topography, it's quite difficult to read road names and to see access info. It still is a major improvement over State fold-up maps. Not as good as a Recreational Atlas version, but still worth the \$\$\$. Delorme remains my Atlas of choice. Be

forewarned, though - it may not be a fast delivery (allow plenty of time for trip starts.) The anticipated date was Sept 26 to October 5th (my trip starts on Oct 7th, so that made me nervous.) However, it was a happy day when sent me an email saying they were able to get it earlier than expected and were shipping immediately. It came on Saturday, Sept 23rd, giving me plenty of time to study the maps and mark them for day-tripping.

Recently moved to PA, indispensable!
