Nuclear Prepared - How To Prepare For A Nuclear Attack And What To Do Following A Nuclear Blast: Everything You Need To Know To Plan And Prepare For A Nuclear Attack

Synopsis

In recent years, the threat posed by a hostile nuclear event has increased to levels not seen for decades. From terrorist threats to those directly attributable to an offensive move by a foreign power, it is now a very real possibility that a nuclear attack or incident of some kind could unfold and cause unimaginable levels of death, destruction, and massive disruption. In short, knowing how to survive a nuclear attack is more important now than it has been for decades. It is with this in mind that many people are increasingly looking to gain the knowledge and preparedness levels to protect themselves and their families in the event that the unthinkable may happen one day. When it comes to thinking about how to prepare for a nuclear attack, it's important to start with one fundamentally critical point: Nuclear attacks and the after-effects of a nuclear blast can be prepared for ahead of time. As with any other kind of disaster preparedness planning, this is an absolutely crucial factor to keep in mind when thinking about this subject and adopting strategies to survive a potential event. There will of course always be uncertainties and unknown factors that come into play with this kind of incident - there always are - but there are also a whole load of things that we do know about the effects of a nuclear blast and the likely events before, during and after an attack that can be anticipated and prepared for ahead of time. Armed with this knowledge, you can get to work preparing a response strategy and plan that can be called upon in the event that a nuclear attack is underway, has recently occurred or seems imminent. Offering practical advice and covering everything from the essential information on nuclear threats through to actionable plans for nuclear home preparedness, this book is the definitive layman's guide to planning for, preparing against and ultimately, surviving a nuclear attack
