This book illustrated a large number of the top quality archaeological master-pieces in Chinese history. Although I know their value as a Chinese, I still be amazed by the beautiful pictures in this book. This is definitely one of the best in this category. I bought a use one at about \$3. Regarding the quality, it is a enjoyable purchase. I think this book might be subsidized by Chinese Government. You can find the preface from the former Chinese President and Bill Clinton. I think that can

probably explain why the price of this book is so reasonable.

The paperback edition is unbelievably priced at less than \$20 for 584 pages of high quality paper with every photo printed in full color. The editorial reviews says it all. But I just wanted to add that looking at the diversity of artifacts (many of which look surprisingly strange) in the early periods of China's history further I'm further convinced that the modern Han people came from the merging of many ancient cultures.
