Universe

Synopsis

This comprehensive textbook for the two-term course focuses students on not only the foundational concepts of astronomy but on the process of scientific discovery itself—how we know what we know about the cosmos. Engagingly written and filled with helpful pedagogical tools, the book also excels at dispelling widely held misconceptions and helping students avoid common pitfalls as they explore the heavens. Thoroughly updated, the new edition features the latest discoveries and new pedagogy, and is supported by an expanded media/supplements package centered on W. H. Freeman's extraordinary new online course space, LaunchPad.

Book Information

Paperback: 800 pages

Publisher: W. H. Freeman; 10 edition (December 26, 2013)

Language: English

ISBN-10: 1464124922

ISBN-13: 978-1464124921

Product Dimensions: 9 x 1.3 x 10.7 inches

Shipping Weight: 4 pounds (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars 16 customer reviews

Best Sellers Rank: #16,232 in Books (See Top 100 in Books) #25 in Books > Textbooks > Science & Mathematics > Astronomy & Astrophysics #34 in Books > Science & Math > Astronomy & Space Science > Cosmology #46 in Books > Science & Math > Astronomy & Space Science > Astronomy

Customer Reviews

Roger A. Freedman is a Lecturer in Physics at the University of California, Santa Barbara, USA. At UCSB, Dr. Freedman has taught in both the Department of Physics and the College of Creative Studies, a branch of the university intended for highly gifted and motivated undergraduates. He has published research in nuclear physics, elementary particle physics, and laser physics. In recent years, he has helped to develop computer-based tools for learning introductory physics and astronomy and helped pioneer the use of classroom response systems and the "flipped" classroom model at UCSB. He is co-author of three introductory textbooks: *University Physics* (Pearson), *Universe* (Freeman), and *Investigating Astronomy* (Freeman). Robert M. Geller teaches and conducts research in astrophysics at the University of California, Santa Barbara, USA. Using data from the Hubble Space Telescope, he is currently involved in a search for bursts of lights that are

predicted to occur when a supermassive black hole consumes a star. Dr. Gellar also has a strong emphasis on education, and he received the Distinguished Teaching Award at UCSB in 2003. William J. Kaufman III (deceased) was the author of the first four editions of Universe. During his career he held positions at the Griffith Observatory in Los Angeles, San Diego State University, UCLA, Caltech, and the University of Illinois. A prolific author, his many books include Black Holes and Warped Spacetime, Relativity and Cosmology, The Cosmic Frontiers of General Relativity, Exploration of the Solar System, Planets and Moons, Stars and Nebulas, Galaxies and Quasars, and Supercomputing and the Transformation of Science. Dr. Kaufmann died in 1994.

It's in pretty good condition. Hopefully it will be up to par for my astronomy class!!

I liked the product.

Came on time. Was just what I needed for my class!

Awesome!!!

Got here quick did the job

Good!

Well written book, easy to follow, great diagrams.

I used this for many reference for the semester.
