Enger, Environmental Science: A Study Of Interrelationships Ã,Ã© 2013 13e, AP Student Edition (Reinforced Binding) (A/P ENVIRONMENTAL SCIENCE)

Synopsis

This full-color, introductory environmental science text is known for being concise and conceptual. The approach and reading level cover the basic concepts without overloading students with too much detail. The authors reinforce the text's central theme of "interrelationships" by providing a historical perspective, information on economic and political realities, discuss the role of different social experiences, and integrate this with the crucial science to describe the natural world and how we affect it. Includes Print Student Edition

Eldon is an emeritus professor of biology at Delta College. He has over 30 years of teaching experience in biology, zoology, and environmental science. Eldon has been a Fulbright Exchange Teacher in Australia and Scotland, received the Bergstein Award for Teaching Excellence at Delta College, and participated in an Earthwatch Research Program in Costa Rica. In addition to the environmental science text, Eldon is co-author of the very successful CONCEPTS IN BIOLOGY general biology text with McGraw-Hill. Brad is the Dean Emeritus of Western Washington University in Bellingham, Washington. Prior to assuming the position as Dean in 1994, he served as the first Director of the Office of Environmental Education for the U.S. Environmental Protection Agency in Washington, D.C. Brad also served as the Acting President of the National Environmental Education and Training Foundation in Washington, D.C., and as a Special Assistant to the EPA Administrator.

Before moving to Washington, D.C., Dean Smith was a professor of political science and environmental studies for 15 years, and the executive director of an environmental education center and nature refuge for five years.

All is good and as expected
