Ted's Greenhouse: Creating A Four-Season Passive Solar Greenhouse From The Ground Up

Ted's Greenhouse

Ted Keller and Peggy Hamill

*Creating a Four-Season
Passive Solar Greenhouse
From the Ground Up*

Synopsis

WINNER in the 2017 National Indie Excellence Awards in Home and Garden!! FINALIST in the 2017 National Indie Excellence Awards in Green Living!! If you have ever dreamed of growing your own vegetables and flowers year-round in a passive solar greenhouse, this is a book you will be interested in. The greenhouse described in this book provides the owners, neighbors, friends, and family with an amazing abundance of vegetables in all four seasons. Tedâ€™s Greenhouse describes the process of building this 484 square foot passive solar polycarbonate greenhouse from the foundation to the finish. Included are chapters on passive solar design, siting the building, permits for the building, cost considerations, materials, and greenhouse coverings, with a special emphasis on the polycarbonate that is used to sheathe this building. A complete set of building plans is included, along with a description of the building process, step by step. While the book does describe one specific design, the plans could be adjusted to fit various budgets and situations. Also covered is information on how to use the greenhouse for plants. Chapters on soil, experiences with a variety of plants, pests and diseases, and how to heat and cool the greenhouse are included. The addendum adds reviews of various products that have been tried in this greenhouse, and resources that are available to the greenhouse grower. There is a materials list and a cost breakdown. Tedâ€™s Greenhouse is an elegant, functional building that will add joy to your life and beauty to your property.

Customer Reviews

A wonderful book! Ted's greenhouse is one of the nicest ones I've seen - a dream greenhouse, beautiful inside and out. This book is so well written and extremely thorough, from plans to types of materials, costs, resources for products used. The section on plants that grow well in greenhouses, including types of soil, fertilizers, pest control, was very informative and enjoyable to read. Thank you, Ted and Peggy, for writing this great resource for those of us who attempt to grow food year round.

This brilliant and imaginative book pulls you in right away by the gorgeous cover, and includes many bright and vivid photos throughout. The book explains how to build a greenhouse from scratch in a detailed and user friendly way, including where to find resources, how to troubleshoot problems, and tricks for creating a successful structure for your area. As an added bonus, the book explains how to initially create beds in the greenhouse for year-round gardening, and the authors' success stories (or vice versa) for creating a lush, abundant, and productive year-round crop. It is a beautiful book to have around, and it's friendly, across-the garden-fence tone will inspire gardeners and carpenters to give it a try.
