Customer Reviews

REVIEW OF THE LAST EDITION: "A good book has just gotten better."-Archives of Dermatology

--This text refers to an out of print or unavailable edition of this title.

Thomas P. Habif, MD, Clinical Professor of Surgery (Dermatology Section), Geisel School of Medicine at Dartmouth, Hanover, NH, USA

Best dermatology book. Pictures very helpful. Beginning with differential dx based on body area fantastic. Exactly right amount of information for clinical diagnosis and treatment.

Pretty good and quick resource for Derm when you are in clinic. Derm is always tough as Primary Care since you see so many random rashes.

I have owned or used the various editions of Habif's Clinical Dermatology for over ten years in our general internal medicine practice and return to it again and again. I have also used a variety of

other Dermatology books brought in by staff - typically the \$60 - \$80 range books. They are typically o.k. but nothing stands up to Habif and I recommending spending the extra \$ for it (in the \$125 range). The pictures are big, clear and of typical presentations, the layout logical, the review of basics up front helpful and thoughtfully presented. You will find that this is the one you reach for when you need help.

The bible of Dermatology. Don't use it as much as I planned, but a great resource in FP.

Very informative. Bought this book for my self as a resource book.

As expected

Love it.

I cherish this book. I utilize it practically ordinary in clinicals.
