Customer Reviews

This is a valuable little tool to have at your disposal- especially during a dermatology rotation. Very concise and logically arranged. The print quality is excellent and there is a laminated feel to the pages. The ringed binder at the top is well built so don't worry about the pages coming out. Yes, there are some imperfections as others have noted; however, I am under the belief that the pros largely outweigh the cons. My one complaint is that it's a little bulky and makes the pocket of my white coat stick out too much. I don't think that's a good look for a clinic. Just a personal opinion. A solution to this would be to take it off the binder and remove some of the sections that you've already committed to memory to reduce the overall bulk.

Easy reference to use while on a dermatology rotation. I used this a lot while I was standing around in the hallway between patients - great to look up what you just saw and cement the information in your mind. A bit pricey.

Perfect quick reference to keep in your pocket.

Fits right into your lab coat, and has absolutely everything you would need to as a student or beginner in a dermatology setting. Also very helpful for primary care settings with higher populations of geriatric patients, as they often present with skin conditions that are well described in this pocket reference. Great find for a wonderful price!

LOVE this pocket guide. Everything is clear and it is organized very well. I am a second year student and have already gotten to use it several times while in clinic.

It is a lot for a pocket book. Small pics can be frustrating. But it is exactly what one might expect from a pocket guide of this size. I am sure I will get use from it.

Better than expected,

Great product
