Synopsis

After an early hiking experience, Rick started dreaming about challenging adventures for himself. 3 Outta 4 recounts how those dreams were turned into realities over a number of years. His completed trips include hiking the Appalachian Trail, biking across the country, and canoeing down the length of the Mississippi River. One trip remains from his original list. As Rick experienced each trip, the lessons came quickly. Through a series of anecdotes, he shares some of those lessons and his experiences in a humorous manner. The book can be enjoyable for those generally interested in accomplishing goals. Hopefully, the book encourages some readers to chase their own dreams. Equipment lists, costs, and statistical summaries of the trips are included to help those interested in similar adventures.

Customer Reviews

This is a must read for those bold enough to face the ultimate challenge-the limits of one's self.

Being skeptical about the elevation gain that we have just climbed, I get out the book of maps. We carry only photocopies of the relevant pages on the bikes and they have no legend on them. From the start on Interstate 10, the contour intervals repeatedly add up to 800 feet. My skepticism continues until a recheck or the legend reveals that the contour lines are meters-not feet. This works out to 2,600 feet, not 800! This is my first map with elevation measured in meters, although curiously, the road distances are all in miles. My map reading abilities now come into serious question. People line up to check over my shoulder while I plan the route for the next day. On the plus side, Jim doesn't feel nearly as bad when he finds out the true elevation of the climb. We both

sleep well.

Great book!!
