Back To A Future For Mankind: BioGeometry

Synopsis

This first-ever published collection of writings by Dr. Ibrahim Karim reflects the holistic essence of his worldview. Dr Karim is the founder of the Science of BioGeometry in the early 1970s. BioGeometry is the science that uses shapes, colors, motion and sound to induce harmony into the subtle energy qualities of the environment. At the core of this harmony is a subtle energy quality found in the transcendental centers of the forming process of nature and is the main quality in sacred power spots of humanity that give a spiritual dimension to the timeless monuments erected since the dawn of humanity. With his experience as an architect and a scientist Dr. Karim has synergized aspects of Pythagorean Harmonics, Subtle energy sciences, Radiesthesia, Geobiology, Building Biology, Sacred Architecture & modern wave theories to produce a new Physics of Quality from which the science of BioGeometry emerged. *BioGeometry bridges science and spirituality to produce a natural harmony into the environment. *BioGeometry provides a viable solution in transforming the quality of the effect that electromagnetic radiation has on living systems. Successful projects in Switzerland in collaboration & acknowledgment of Swiss authorities prove its efficiency to take our modern science into the future. *BioGeometry provides new solutions to Earth Radiation, which is a serious health hazard if not acknowledged in the location and design of our buildings. * A new energy-quality-based analysis of the Great Pyramid in Giza, reveals new knowledge on the foremost of the wonders of the world and on the essence of the great Ancient Egyptian civilization.

Book Information

Paperback: 344 pages

Publisher: CreateSpace Independent Publishing Platform; 1st edition (May 5, 2010)

Language: English

ISBN-10: 1449963951

ISBN-13: 978-1449963958

Product Dimensions: 6 x 0.8 x 9 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 72 customer reviews

Best Sellers Rank: #72,713 in Books (See Top 100 in Books) #7 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > Energy Efficiency](#) #102 in [Books > Science & Math > Astronomy & Space Science > Cosmology](#) #119 in [Books > Crafts, Hobbies & Home > Sustainable Living](#)

Customer Reviews

Ibrahim Karim, Ph.D. /Dr.Sc. is a graduate of the prestigious Federal Institute of Technology (ETH), Zurich, Switzerland. Founder of the qualitative science of BioGeometry & the new Architecture and industrial design school that uses the subtle energy effect of geometrical shapes to induce harmony to our modern technological or natural environments. He currently teaches at several universities and supervises numerous postgraduate studies on the applications of the science of BioGeometry. Dr. Karim was recognized and honored by several institutes for his work in the environment and was chosen as man of the year by the Swiss magazine "Anzeiger" in 2005 for his success in reducing the effect of 'electrosmog' in several regions in Switzerland. These projects were done in collaboration with the Swiss Mediation Authority for Telecommunication & Environment, Swisscom the main cellular provider and the Local Governments. The results received wide media acclaim and were featured in several documentaries on the Swiss National Television. For many years Dr. Karim held several advisory positions in Egypt to the Ministers of: Health, Culture, Tourism, and Scientific Research; where he headed a research unit at the National Research Center to study the effect of geometric shapes on the life functions of micro-organisms after the acknowledgment of success and patenting of his research. As a practicing architect he heads his own architecture consulting and industrial design firm. Dr. Karim is a respected and renowned figure in the Middle East through the media exposure of his work. He hosted his own show and is a popular guest in many talk shows on several television channels.

Dr Ibrahim Karim is one of the outstanding leaders in the field of form and energy. Having taken the BioGeometry (TM Foundation Class from Dr. Robert Gilbert in the US of Dr Karims principles, this field is exciting and very relevant to our times. We have a chance to learn these very ancient principles behind how to design structures so that life supporting energy automatically is generated other than the default killing energies from microwaves, cell towers, etc. This is not pseudo science, it is meta science and mainstream science is on the verge of discovering what the Ancients and Dr Karim had known. Highly recommended.

Purely genius, and original in every respect, Dr. Karim's discoveries are revolutionary in their importance. He has discovered a new science (or rediscovered an old science) for healing with shapes. The historical role of a science of subtle energies in building sacred temples and cathedrals is very well described. Also, this marvelous book explains the ancient Egyptian's science of consciousness, and more generally includes a history of humanity's developing consciousness. One

of the few books I have come across that coherently and meaningfully describes how spirituality and modern science are related, or not.

I didn't really learn as much as I would have liked, based on the reviews of the book. Though I do know now how devices, such as q-link supposedly get their science from. I tried one such device and it only had a mild effect. The explanations behind why this "technology" works is for the most part theoretical and does not fully convince my logical mind. I wouldn't be surprised if someone came up with a totally different explanation of how or why this works. Is negative green the same thing as shar chi energy in feng shui? Orgone/ether energy? The science behind this field is so new that it really is not explained that well. There is some science in this book, but it is poorly correlated with the explanations of how biogometry works. He does not explain very well how he obtained his numbering system. And the shape systems, some of which, contradict what is found in feng shui. It could be, for example, that these biometric devices do not affect the electromagnetic spectrum of certain devices at all, but instead harmonizes the etheric/feng shui field in an area, which causes the positive effect in people, which could explain the positive effect that people have had. Until equipment is developed to prove his theories, I remain skeptical of his explanations, despite the fact that biogometry may do some overall good for people.

As the author is the developer of the material he gives a good background and interesting examples. Weaker points are that he repeats himself too much and there are too few practical explanations.

Every person on this planet should read this book. This book changes the way we see our life purpose, the past, the world, each other, and all life around us. This book emphasizes our responsibility as human beings, and how far we have traveled away from our universal connectedness to that truth.

Dr. Karim brings light on ancient knowledge. Fascinating.

Reuniting me with hope and faith for the human race, this book is nothing short of remarkable! The solutions outlined within the pages of this masterpiece are breathtaking and show immediate avenues for application in every field imaginable! Keeping my copy tight and in my will to my children as an heirloom, this book holds a place in my heart that is dear and I recommend it often with fabulous feedback from every single person I know that has read it so far!!!

It might not teach you directly how to do "biogeometry" but with some tinkering you can learn a lot, since the thought process behind what is in this book is more valuable so you can design your own method. So I'm rating this book 5/5. And I look forward to the incoming books, this information is desperately needed, so I hope they can hasten the release of these books and put it in online format in like this one. Since not everybody can afford to go to the USA or Egypt to learn biogeometry. Thanks for the book, worth every penny of my money, one of the best books in for sure.
