Critical Thinking Press Balance Math & More Level 2

Synopsis

The Balance Math & More! activities sharpen your child's critical thinking skills, computational skills, and develop algebraic reasoning. The second book (Level 2) focuses on multiplication and division of whole numbers, but has a few problems involving fractions. The spiraling difficulty level is designed to scaffold a child's conceptual understanding of the targeted operations from beginning to advanced. Try one of these intriguing puzzles -- and then try to stop!

Book Information

Series: Balance Math and More! (Book 2)

Paperback: 48 pages

Publisher: CRITICAL THINKING PRESS (2010)

Perfect for my 4th and 5th grade gifted and talented students to work at their own pace. I'm using it in conjunction with Hands on Algebra and the students are really understanding the concepts of balancing both sides of an equation by substituting, replacing (subtracting), and dividing.

My 4th grade accelerated math students enjoy solving these balance puzzles. They are fairly easy for them, but they still enjoy!

very enjoyable and useful to supplement the homeschool curriculum of my 10 & 12 year old.

My kids and I like how this workbook get you to think differently.

Great challenge resource for students that are interesting in learning Algebra!

Great product!

My daughter completed Level 1 and just started the Level 2 book. She really enjoys these problems and they are great for really making you think. She is able to solve all the problems but they do cause her to really think to figure them out.

I was looking for a challenge activity for my third graders. They LOVE doing these pages!Algebra and logical thinking all in one. Brilliant!
