So thrilled to have found this! I am looking forward to starting this study with my grand daughter! (age 5) I know that sounds young to most people, but I believe in telling her the truth, age appropriate, but not sugar-coated. I spent my whole life in "church". and only recently started learning the truth of God's Word, and finally understanding the book of Revelation. If someone had walked me through it when I was young, I would have gotten it! The Church needs to wake up and start teaching the truth! This book is well written, taking you verse by verse through the chapters, with questions and activities to help you really focus on what is being said. An older child could do this on their own. I would recommend it with adult oversight to help the child talk through what they are learning. With younger children, like mine, I would recommend it being read TO them as you go, and then you can adjust to what you feel comfortable with for their age and comprehension.

I bought this intending to do it with my 11yr. old daughter and 8 year old son. They were interested in the book of Revelation and we wanted to study it with our homeschool. After a few days in I can see that this will work well for my 11 yr old, but is just too advanced for a typical 8 yr. old. I would say that the material is well written, but the age group should be shifted to 4th-7th grade.

I'm working through this now with my almost 8 year old and she likes it so much better than the bible study we were doing. It's really great to talk about this book and ask questions. She's learning a lot, although it can still be confusing. Just the right amount of time for each lesson too. Some are just too short and we don't get into much discussion so I like that this one takes a little more but not too long. Maybe 20 minutes.

I'm so glad we purchased this. I got the sample first and went through it with my daughter. She begged me to buy it. It's a great way for her and I to spend some quality bible time. In her words, "I've learned more from this than Sunday School or youth group!" This is a topic not usually covered much with kids, and this is done in such a way that they find the answers for themselves with the help of the Holy Spirit. After we finish this study, we'll be getting another of Kay Arthur's guides.

Revelation is the only book of the Bible that promises a blessing to those who read it ("Blessed are

those who hear and those who read the words of the prophecy and heed the things that are written in it; for the time is near" Rev. 1:3). We have indeed been blessed. The book is an intro (Chapters 1-7) to the more complicated part of Revelation, so it is not scary (a concern of my husband). We work on the study together (my kids are ages 7 and 8), but it allows the kids to figure out what the Bible is saying on their own. I think it is important to talk to the kids throughout the study to reinforce what they are discovering, but it really leads them to discovering what God is saying without providing a lot of its own interpretation. The book also touches on educational topics like pronouns, the 5 Ws and 1 H (what, who, when, where, why, how), and reading comprehension. It's a great book -- you can't go wrong with Kay Arthur. We will definitely be doing the next book (Revelation chapter 8-22) after we finish this one.

Our Children's Church ministry is teaching on the Book of Revelations and this Bible Prophecy for Kids makes it very easy to teach this book on a kid's level. The fill-in-the-blanks pages reinforce the scriptures because they have to read the scriptures to complete the pages. The staff loves it.

I am so excited about this book and have started teaching my Sunday school class with this wonderful instruction on understanding Revelation. I wasn't sure I could teach this when my students ask but God lead me to this book and WOW! Thanks to the authors. Would Highly recommend this book to any parent or teacher!

Adapting this for Sunday School for kids 10 to 13 has been easy. Older students can work independently while I assist younger kids. It is inductive so personal opinion is kept to a minimum letting the students find nuggets of truth for themselves.
