Unfortunately, but not surprisingly, this journal is filled with several inaccuracies, lacks cognitive recollection of important details, and is an example of why the jury selection process should hold people to a higher intellectual standard- common sense to say the least. This is one man's pathetic attempt to rationalize his inadequacies and inability to pay close attention to details and recall specific important information. Although I must admit, I am not surprised by his public display of illogical thinking and opinionated judgements, due to his lack of character and integrity and his

"Holier than Thou" attitude. Don't waste your money or time. Piece of advise to the "author" for lack of better term, spell check before publishing.

I found this little book very informative about the workings of a jury. The feelings a juror goes through is something few of us consider. Thanks for writing this book!

juror 7 might be interested to know that Tyler was examined by the psychologist who testified at trial but was prevented from testifying that he did diagnose Tyler as having PTSD and TBI by the judge that he likes so much. Juror 7 shifted the burden to Tyler to prove his innocence, violating his oath to hold the state to its burden of proof beyond a reasonable doubt. He spectacularly failed Tyler.
