Amazing Mazes (Kumon's Practice Books)

Synopsis

This book builds on foundational pencil-control skills by tracing lines through increasingly challenging mazes. The exercises have many three-dimensional illustrations, such as towns, streets, and parks, which engage children's curiosity. This amusing practice will also help children acquire the ability to concentrate, a crucial study skill for the emerging student.

They are easy to medium for my 4 year old daughter. The ages says 4-6 on the cover of the book. I would say 3-5.

My son is almost 5 and he breezed through this book way too fast though it was nice to see that he had to think about these before he did them. I bought a really big book of preschooler mazes at a wholesale club but he was able to cruise through that 200+ page book in a month of off and on use on the weekends. Both books cost the same. This book was definitely harder but after a week he had already gone through most of the whole book. I have twins so I had another book - yes, I buy two of everything - so this time I took that one apart (after boy #2 rejected it for the most part) and didn't give him the whole book at once. Made that one last much longer. A good choice and the mazes definitely made him think about how to work them out before doing them - something he didn't have to do much of in other books we tried. A good and fun book. My other son didn't seem to have the patience to want to put much time into thinking about the mazes before he did them so he had no interest in it after a few uses. He found it a bit frustrating which I found odd because he is my "must color within the lines perfectly kid". I would recommend this book but it makes me wonder if it might be a bit too easy for a 6 year child.

My kids love the Kumon books. My 3 year-old does these puzzles. I'd say he's maybe a little on the advanced side, so I would say probably on average 4-5 year-olds would love this and it would be a little easy for the average 6 year-old. I had to sit with him and really show him how to do them the first couple of pages, but after that he could do them on his own. I really liked that this particular book seemed like a challenge for him. Some other activity books for little children are so easy that they can flip through it in minutes and be done! My son would do 3 or 4 mazes a day and then be done and each maze took him a couple of minutes at least. Really great for concentration, motor skills, critical thinking, etc. Excellent product.

I'm not a fan of kids playing with electronics 24/7....so instead of taking out a tablet or phone for my kids to play with when they are at a restaurant, I give these kumon books to him to play and work through when we eat out....it's a good time killer when they are waiting for their food to come or

when they finished their food but the "boring chatty adults aren't done with their meals or conversation".....

I have a 5 yr old who loves the maze books! I use these as a 'reward' when he has finished his other homework. Kumon has colorful and happy pictures and the mazes are perfect for the starters. We have already gotten the next maze book where the mazes get a little harder. This has even doubled as a 'cutting' book because my son likes to cut the pictures out after he has done the maze. The only con - and I say this in all my Kumon reviews - is that they don't perforate their pages. It would make life SO much easier if Kumon would spend a little more and run the pages through a perforator on the press before having it bound. I am tired of trying to remove pages and ripping into the pictures and such. Aside from that one thingÃ¢Â¢Â¢ this is a great book for little ones.

You can tear out the pages if you like. They are perfect for my 4 year old daughter- she was hesitant at first cause she had never done a maze before, but she caught on quick and they are too easy for her now- but she still enjoys doing them. We use them as writing practice. I tell her she needs to be careful to keep the line in the middle of the maze corridors to help with her fine motor skills and control.

I bought this for my almost 4 year old son. I expected him to not be able to get through it for at least a few months because he is still 3. He absolutely loves mazes and this book was the perfect thing to challenge him. The mazes started out right on his level and progressively got more challenging. It really has improved his logic and reasoning skills. There are 80 mazes in the book and he did quite a few each day, so he got through it pretty quick but he really enjoyed it. I would recommend this book for any child who loves a little challenge.

grandchildren loved it!
